OBJECTIVE

Senior Laravel Developer with 6+ years of experience in building scalable web applications, including e-commerce, telemedicine, and HR systems. Skilled in PHP, Laravel, MySQL, PostgreSQL, Vue.js, RESTful APIs, and performance optimization. Notable projects include Dairy Queen, Remetric Health, DriQ, and ARTdynamix®. Seeking to contribute technical expertise, leadership, and innovative problem-solving in a dynamic, collaborative environment.

SKILLS

Programming	PHP, Laravel, Vue.js, JavaScript, AJAX, jQuery, HTML, CSS, Bootstrap
Databases	MySQL, PostgreSQL
Frameworks	Laravel, Vue.js
Tools	Docker, Git, Postman, VS Code, Jira
Concepts	OOP, SOLID Principles, Repository & Service Layer Pattern, MVC, Clean Architecture, API Integration, Performance Optimization, PHPUnit, Database Design
Soft Skills	Communication, Problem Solving, Team Collaboration, Leadership, Multitasking

EXPERIENCE

Senior PHP Backend Developer   Jan 2025 – Jul 2025
PointOfIT Pvt Ltd (Remetric Health, USA)   *Islamabad, Pakistan*

- Backend development for the US-based telemedicine platform Remetric Health.

- Designed and optimized APIs, built custom reports, and improved performance of patient monitoring modules.

- Collaborated with senior developers to deliver secure and scalable healthcare solutions.

Team Lead & Laravel Developer   Apr 2024 – Dec 2024
Dream Warrior Group (Dairy Queen, ARTdynamix® SaaS)   *Remote (USA)*

- Led the **Dairy Queen** project from start to finish, overseeing architecture, backend development, and successful delivery.

- Enhanced **ARTdynamix® CMS**, adding new modules and integrating ticketing and fundraising platforms for arts organizations.

- Optimized system processes and improved overall application efficiency.

Laravel Developer   Sep 2019 – Apr 2024
AT Tech (DriQ)   *Islamabad, Pakistan*

- Developed and maintained the telemedicine platform DriQ.

- Built secure patient-doctor workflows, appointment scheduling, and electronic medical records.

- Focused on scalability, API security, and database query optimization.

PROJECTS

Dairy Queen (Laravel)

Designed and implemented financial tracking system for multiple stores. Built multi-role and permission-based modules with detailed financial reports. Successfully led the project lifecycle from architecture to deployment.

Remetric Health (Laravel)

Developed secure APIs for Remote Patient Monitoring (RPM) devices. Optimized backend performance for chronic disease monitoring workflows. Contributed to HIPAA-compliant data security implementation.

ARTdynamix® SaaS (Laravel)

Enhanced multi-tenant CMS with drag-and-drop builder and ticketing modules. Integrated fundraising and event scheduling features. Improved SEO and scalability for large-scale clients.

DriQ (Laravel)

Developed patient-doctor consultation and EMR modules. Improved appointment scheduling system and reporting tools. Ensured data security and scalability in healthcare workflows.

Keyword Caddy (Laravel APIs + Vue.js)

Built REST APIs to support keyword tracking and SEO content workflows. Developed Vue.js frontend for seamless keyword management. Enabled real-time keyword reporting and analytics for users.

Retbajri (Laravel)

Developed a **multi-vendor construction materials marketplace** with vendor dashboards. Built order, product, and payment workflow modules. Implemented scalable database design for large product catalogs.

HRIS System (Laravel)

Designed recruitment and employee management modules. Built online exam and interview/test workflows. Automated contract generation and employee record keeping.

EDUCATION

BS in Software Engineering, IIUI (International Islamic University Islamabad)   **2014 − 2019**
